With the core of Kela PV Power Plant being based on hydro-solar collaboration, the facility doubles down on clean energy efficiency by feeding unstable solar directly into the Lianghekou ...

It is expected to install 2.45 million N-type solar modules, which are more efficient than P-types, making it China's largest solar power plant using only the N-type.

With an enhanced installed capacity of 1 million kilowatts, the Kela PV Power Plant features more than 2 million PV modules and connects to the Lianghekou Hydropower Plant through a 500-kV ...

The Kela Photovoltaic Power Station is the world's largest integrated hydro-solar power station, and the first under-construction integrated hydro-solar power station of the Yalong River ...

With large proportion of Astronergy PV modules, the power plant could help to reduce the use of 600,000 tons of standard coal annually and reduce carbon dioxide emissions by more than 1.6 ...

Once the Kela PV Power Station is completed and put into operation, Yalong Hydro will raise its total installed capacity of green, clean and renewable energy to more than 2 GW.

With a planned total installed capacity of 3 million kilowatts, the plant, along with the hydro-wind-solar power stations in the Yalong River Basin, will emerge into the world's largest green, ...

It will host around 2.45 million solar panels, 5,138 string inverters, and 367 transformer substations. A remarkable highlight is that it will be China's largest single-site PV power station ...

As Yaliang continues to grow, it remains a testament to sustainable rural development. The village plans to further enhance its mango industry by developing a 'heritage mango' brand, ...
