In this report, we explore the opportunities and risks associated with the residual value (RV) and follow-on value (FOV) of electricity generators. To illustrate the value of RV, we assume a ...

We estimate a hedonic model and find that the residual value of a homeowner-owned solar system at the time of a transaction is roughly fully capitalized into home values when we use a ...

Drawing upon a vast amount of plant-level empirical data, we quantify the net market value ("net value") of wind and solar over time and explore various factors that determine the extent to which consumers ...
