TotalEnergies Launches the New Mali solar plant in Kayes Region TotalEnergies has officially announced the launch of a new 50 MWp (megawatt-peak) solar power plant in the Kayes ...

Discover how a solar power plant in rural Mali is revitalizing a village and inspiring hopes for reliable electricity across West Africa. Source: Africazine.

In the remote village of Karan, Mali, solar power has sparked remarkable change. The installation of a mini-grid operated by WeLight has provided 3,000 residents with reliable electricity, ...

In response to the persistent outages from EDM, which primarily relies on generators and diesel, innovative ideas for mini solar power plants are starting to take root in Mali's more isolated...

Across southwest Mali, near the Senegalese border and 500km from Bamako, thousands of new photovoltaic modules now track the sun above B2Gold's Fekola gold operation, marking the ...

In the heart of West Africa, Mali is undergoing a transformative energy shift as it embraces solar power to light up rural communities long deprived of reliable electricity.

In Mali's quest to increase electricity access to its population, (26 percent in 2012, 35 percent in 2016), to 87 percent by 2035, the country is increasingly turning to solar energy. Current and future solar power plants include (a) the 50 megawatts Kita Solar Power Station, which came online in 2020 (b) the 93 megawatts Touna Solar Power Station, expected online in late 2022 or early 2023 and (c) the 100 megawatts Diama Solar Power Station, in the planning phase.

The 200 MW solar plant will span 314 hectares in Sanankoroba, near Bamako. Upon completion, it is projected to increase the West African nation's electricity production by 10%.
