This project aims to decommission one of South Africa's oldest coal-fired power plants and replace it with 220 MW solar PV and wind power, as well as 150 MW battery storage. The funding comprises significant ...

Red Sands will be Globeleq's first Battery Energy Storage Solutions (BESS) project in South Africa but the Group owns and operates a combined solar and BESS plant at Cuamba in...

Africa 's largest standalone battery energy storage system (BESS) project, the 153 MW/ 612 MWh Red Sands project in the Northern Cape, has reached financial close, having raised some...

South Africa has reached a major milestone in its renewable energy transition, as three cutting-edge Battery Energy Storage System (BESS) projects, collectively known as Oasis, progress toward ...

The Project will be implemented at approximately 17 sites, located within or adjacent to existing distribution substations of Eskom, across four provinces of South Africa. The Battery Energy Storage Project (Project) ...

The BESS project serves as a direct response to meet one of the urgent needs to address South Africa's long-running electricity crisis by adding more storage capacity to strengthen the grid while ...

Developed by Globeleq, which is 30% owned by Norfund, in partnership with African Rainbow Energy, the 153 MW/612 MWh project was signed off in June 2025 in Cape Town. It will be located in South ...

The Department has launched the third bid round under the Battery Energy Storage Independent Power Producers Procurement Programme (BESIPPPP), calling for 616 MW of new generation capacity will ...

A sustainable energy milestone Battery energy storage is more than an engineering achievement - it's a catalyst for change. By enabling renewable integration, reducing emissions, and stabilising supply, the Eskom BESS ...

South African battery energy storage project

The project was awarded preferred bidder in 2024 under the South African Government's battery energy storage independent power producer programme. Red Sands BESS will enhance grid stability by storing energy ...
