What is an outdoor Telecom cabinet?

Technologies such as digital transformation, Industry 4.0 and Big Data create revolutionary differences in our lives. Outdoor Telecom Cabinets are rugged enclosures designed to protect telecommunications equipment from environmental factors while providing secure access for maintenance.

Why do oil and gas field communications need high capacity wireless networks?

Oil and gas field communications require reliable and resilient, high capacity wireless networks that operate over large areas under extreme environmental conditions.

What is a wireless Oil & Gas Communication Network?

Ideally, wireless oil and gas communication networks deliver broadband speeds and form a scalable foundation to securely support multiple applications that increase operational efficiency and safety on one cost-effective physical infrastructure.

How will the oil & gas industry benefit from a common user interface?

To rationalize operations and control costs, tomorrow's Oil & Gas industry will take advantage of common user interfaces for all applications and systems, common network infrastructures, common technologies (Legacy SDH/PDH, Ethernet, IP, MPLS-TP, etc.) and common maintenance systems.
