The updated reciprocal tariffs effective April 2025 have led to notable price increases for solar panels, inverters, and batteries in the U.S., particularly for products imported from Asia.

In 2024, Biden raised tariffs on photovoltaic cells from 25% to ...

In 2018, President Trump added several new tariffs on products from a much broader list of countries. These included the Section 201 tariffs on imported crystalline solar cells, which were extended in ...

Recent developments in the solar panel industry have introduced new tariffs on imported solar components from Southeast Asia, which could significantly impact the U.S. market and project ...

In December, the Biden Administration doubled tariffs on solar products from China. Section 301 tariffs are 50% for polysilicon, wafers, and solar cells for products imported from China.

In April 2025, the U.S. solar industry is navigating significant changes due to newly imposed federal U.S Solar Tariffs. These tariffs average 37% on imported solar panels and 47% on lithium-ion batteries, ...

BANGKOK (AP) -- The Biden administration plans to raise tariffs on solar wafers, polysilicon and some tungsten products from China to protect U.S. clean energy businesses.

In 2022, the solar tariffs were extended, decreasing 0.25% annually to reach 14% by 2026 (U.S. President 2022). The tariff excluded solar products from Canada and Mexico. Tariffs on ...

In December, the Biden Administration doubled tariffs on solar ...

In 2024, Biden raised tariffs on photovoltaic cells from 25% to 50%, and imposed anti-dumping laws meant to stop U.S. companies from importing underpriced solar imports. These ...

The United States increases tariffs on photovoltaic panels

Washington, DC - In a sweeping move that's sending ripples through global energy markets, the United States has announced significant tariffs on solar panels imported from Southeast ...

Tariffs on imports will increase the cost of US solar PV and energy storage technologies and slow the rate of project development, according to analysis from research firm Wood Mackenzie.
