People say wind projects near their homes, different from the off-shore wind farms at sea, have caused a range of harmful effects on their bodies, including migraines, chronic pain, increased...

This comprehensive study explored associations between residing in the proximity of wind turbines, and the prevalence of registered health problems in primary care over a ten-year period ...

Modern wind turbines can be very large machines, and they may visually affect the landscape. A small number of wind turbines have also caught fire, and some have leaked lubricating ...

There is no authoritative evidence that sound from wind turbines represents a risk to human health among neighboring residents. The only causal link that can be identified is that wind turbines may ...

This paper reviews the relevant literature on the effects of wind turbine noise in order to help address the controversy that surrounds the safety of wind turbines and, in this way, to enhance ...

residents, IWTs can negatively affect the physical, mental and social well-being of people." The article goes on to conclude that "...there is sufficient evidenc.

Those towering wind turbines are turning breezes into volts, and they might just be in a neighborhood near you soon! But there's a twist -- some people are claiming that the disadvantages ...

One factor that could be stunting growth is misunderstandings among communities and policymakers about the impacts of wind power. It has fewer negative impacts on humans and the environment than ...

As noted, there are over 70,000 wind turbines operating across the U.S. and to date, there is no indication that those with pacemakers have been negatively affected.

The harm of wind power generation to residents

Neighbors of existing or proposed wind projects may also have questions about the turbines or development. Topics of potential concern include sound; shadow flicker; radar, TV, and radio signal ...

What Is Wind-Turbine Syndrome? Infrasound and Audible Noise Studies and Scientific Opinions Research has been a mixed bag. A study by the University of Toronto found no direct link between living near a wind farm and health problems like sleep disturbances or stress. Other scientists maintain that we need more research, especially in relation to infrasound.
