KUNMING, April 7 (Xinhua) -- Two photovoltaic power generation projects in southwest China's Yunnan Province started generating power in full capacity, according to China Three Gorges Corporation.

China Three Gorges Group has connected to the grid a 1 GW hybrid concentrated solar power (CSP) and photovoltaic (PV) project in Hami, Xinjiang. The facility, described as the largest ...

Solar power generated 15.354 billion kWh, a 14.23% YoY increase, while hydroelectricity generated 771 million kWh, a 16.20% YoY decrease. Additionally, its independent energy storage ...

For many years, the northern regions of China have witnessed severe desertification. However, they are now embracing the potential of their abundant solar energy resources, enabling ...

On January 23, 2025, the first green space project invested and constructed by China Three Gorges Corporation in Colombia, the Paranoa Phase I photovoltaic power station, successfully achieved full ...

With the growing focus on renewable energy sources, China's Three Gorges Corporation is at the forefront of innovation in the solar power sector. By introducing a dual-tower CSP project, ...

Three Gorges Renewables is now building three of the 30 new Chinese CSP projects underway, the editor of CSP Focus, Mr. Sun in China previously told SolarPACES, and were advertising for bids in ...

The "Photovoltaic + N" project is the first million-kilowatt-level solar power generation project constructed by CTG in Sichuan. Located at an altitude of up to 3,800 meters, it is the CTG's ...

The 100MW CT CSP project, with an 8-hour MSES, uses solar thermal tower technology fully developed by Cosin Solar. Its designed annual production is 1580GWh and will save 480,000 ...
