Under the scheme, major housing suppliers with an annual gross floor area of 20,000 m² or more in Tokyo must install solar panels and ensure thermal insulation and energy-saving performance. New ...

Against this background, the TMG is preparing a program that will require the installation of solar power generation equipment in new small and medium-sized buildings, including houses.

This article covers considerations on Tokyo's new solar panel installation mandate, current energy generation challenges and examples from Germany's initiatives.

The Tokyo Metropolitan Government, aiming to achieve its 'carbon halving' goal of reducing the city's greenhouse gas emissions by 50% by 2030, is promoting the use of renewable ...

New homes and residential buildings in Tokyo must come equipped with solar panels as of April 1, when a revised ordinance from the metropolitan government takes effect.

Businesses will continue to develop products and services that take full advantage of the benefits of solar power generation. Houses equipped with solar power generation equipment will ...

From April 2025, housing suppliers that provide an annual total of at least 20,000 sq m of floor space within Tokyo must meet new building mandate. Requirements include wall and window cladding...

To supply electricity and make progress in de-carbonization, Morigasaki Center installed many solar panels. Assuming future possibilities, Tokyo Met. accepts setting up a perovskite solar...

The power generation simulations for the 53 locations in Tokyo (Table 1: orientation south, Table 2: orientation southeast/southwest, and Table 3: orientation east/west) can be downloaded here.

To increase the proportion of renewable energy generation, the Tokyo Metropolitan Government will set a

Tokyo City Solar Power Generation

precedent by requiring new detached homes to install rooftop solar panels.
