Our solar surface and submersible pumps are designed specifically to meet the irrigation needs of small and large-scale farms. With high efficiency, long-lasting components, and strong flow rates, your ...

Discover affordable solar irrigation systems transforming small-scale farming with 40-60% cost savings, improved yields, and climate resilience--no electricity or fuel required.

One of the most promising advancements in agricultural technology is the solar-powered irrigation system. This innovative system harnesses the power of the sun to pump water for irrigation, ...

Researchers have transformed a humble shipping container into a portable, solar-powered irrigation control station, offering a sustainable and mobile alternative to traditional irrigation ...

This study explores the design and adaptation of a shipping container into a portable irrigation control station for agricultural operations. The project leverages the structural durability and ...

Learn how Weipu connectors and E-abel enclosures integrate solar power into automated irrigation systems, ensuring reliable water management for modern farms.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Insula's modular, solar-powered containers support irrigation, cold storage, and equipment charging--built for efficiency and sustainability.

Solar shipping container powers irrigation and tools in off-grid farms. Ideal for remote agriculture needing clean, mobile energy.
