The EU has doubled its solar capacity in the last three years. How have subsidies made this possible, what support is still available, and what still needs to happen?

Under the European Green Deal and the REPowerEU plan, solar power is a building block of the EU's transition to cleaner energy. Its accelerated deployment contributes to reducing the EU's ...

Solar plants totaling 66 GW were connected to the grid in EU countries last year, Ember reports. Solar generation overtook coal for the first time as the EU gave up 15.7% (50 TWh) of yearly ...

That's over twice the growth rate for Europe as a whole, and sharply exceeds the paces posted by the five largest solar generators in Western Europe, Southern Europe and Northern Europe...

In a recent weekly update from Solcast, a DNV company, the stark differences in solar conditions across Europe during February were highlighted. While eastern regions enjoyed strong ...

Our forecasts show that Western Europe will drive 46% of solar deployment in the European continent over the coming decade. Installations in Western Europe have soared as solar ...

This March marked the third month in a row that Europe broke a historic power generation record. According to Eurelectric, solar now accounts for over 10% of the continent's electricity mix.

Sunny summer conditions delivered record photovoltaic (PV) production across much of western Europe in June 2025, as high pressure systems brought sustained clear skies and above ...

Solar broke another historical record in power generation this March for the third consecutive month, making up more than 10% of Europe's electricity mix - shows Eurelectric data.
