Brazil We're proud to have a solid share of 100% renewable energy in the Brazilian market. Our goal is to increase the country's overall share of green energy, in order to guarantee access to electricity in ...

The total installed solar power in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). Brazil expects to have 1.2 million solar power generation systems in the year 2024. Solar energy has great potential in Brazil, with the country having one of the highest ...

The Brazilian Atlas of Solar Energy provides a survey of the solar energy availability in Brazil, using over 17 years' satellite data and a radiative transfer model.

Discover all statistics and data on Solar photovoltaics in Brazil now on statista !

Data and information about Solar power plants and their location plotted on an interactive map of Brazil.

The states in the south and southeast regions of Brazil have the most distributed solar capacity: S#227;o Paulo (5.8 GW), Minas Gerais (4.9 GW), Paran#225; (3.7 GW), Rio Grande do Sul (3.4 ...

However, to meet energy demands in the entire country, and to diversify its energy portfolio, other renewable energy sources, such as solar power, are being expanded.

Brazil's photovoltaic energy boom now rests on two complementary pillars. Of the total, 17.6 GW comes from utility-scale solar farms clustered in high-irradiation states in the northeast.

In 2024, Brazil ranked among the top five largest solar photovoltaic markets globally. In terms of installed capacity, the country was among the top 10 worldwide.

Where can I find solar panels for electricity generation in Brazil

Discover all relevant Solar Power Companies in Brazil, including EcoPower Solar Energy and Green Solar Energia

The Brazil solar power market reached 58.5 GW in 2025 and is projected to reach 164.9 GW by 2034, growing at a CAGR of 12.20% during 2026-2034.
